Armed with state-of-the-art information technology tools, techniques, and a skilled workforce, we provide you with customized digital solutions for all your business processes. Our proficiency lies in developing revolutionary solutions for you to meet the challenges of tomorrow's technology.

Let's take part in the new game of conquering desires and marking victory with absolute efficiency by using Digital Solutions
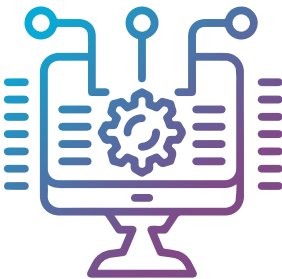

OUR SERVICES

OUR SERVICES

Software Development Services

Custom Software Development

Custom software development also called as bespoke or tailor-made software solutions. Here we gather your requirements, analyze it, design the solution, develop it, test it in several ways and finally release the unique software only for you as you expected.

Standard Software Development

These software's may be good for small business, because they come with a set of pre-packaged solutions for you to use immediately and capable of handling many user profiles. They are limited to some extent on performing broad tasks due to their widespread usage across sectors.
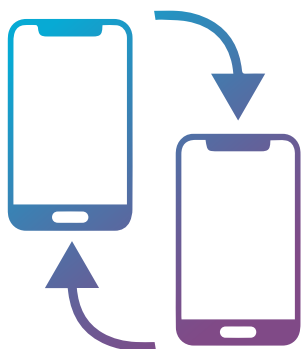

Mobile App Development Services

Native Development

Native mobile app development means creating a mobile app specially tailored and dedicated to a specified platform like IOS or ANDROID.

Because native applications are built specifically for the operating system, they provide higher user engagement than hybrid apps. Native mobile apps generally perform and look better than their web-based counterparts, which must serve numerous platforms. Furthermore, native mobile applications have access to devise hardware and capabilities, such as sensors and cameras, that are not available via a mobile browser interface alone.

Cross-Platform Development

This is the challenge of needing to build mobile apps for multiple platforms, specifically for both Android and iOS. This is why cross-platform mobile development solutions have emerged as one of the most popular software development trends. Also called as multi platform mobile development and hybrid mobile development.

OUR SERVICES

Web Designing & Developing Services

Web Design

We understand all things web design and development, from UI/UX, to wireframes and R'n'D, we've got all you need under one roof. Our expert team of professional designers and developers can take your business to the next level, be it a start-up or an already successful business. We work with you side by side to ensure that your ideas are realized and to guide you through the process so that you get a functional website that is bespoke to your brand and audience.

E-commerce

We offer tailor-made eCommerce website developments in Sri Lanka according to your specifications and the current trends. Tectera specializes in creating eye-catching, functional eCommerce sites that will enhance your online presence and increase your revenue.

OUR SERVICES

Search Engine Optimization – SEO Services

Your business must show up within the first 10 Google search results, and to get there you need good SEO practices. That's where we come in, no matter the size of your company if you don't have a good Google ranking your digital presence will dissolve into nothing. We are a top SEO company in Sri Lanka and know exactly what we are doing. Let's work together to get your company up there through organic traffic driven by good SEO.
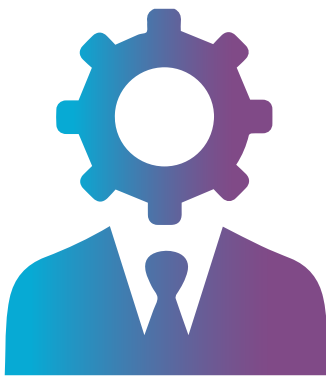

Social Media Management Services

A higher engagement or more followers and likes aren't the only factors that affect your online presence. A brand needs to be respected and taken seriously, and we have the formula for that. Our experts will create social media posts and content that is unique to your brand and message. We make sure your targeted audience sees your content and engages, increasing traffic and improving your business. We are the one-stop shop for all your social media marketing needs, so let's work together today!

OUR SERVICES

IT Consultancy Services

We provide advisory services to organizations operating in the Corporate Sector, Government Sector, Not-for-Profit Sector, etc., and projects sponsored by Donor Agencies and International NGOs. No matter what type of an organization you are and no matter what kind of service you are looking for, our highly qualified, well-experienced, and dedicated team is always ready to serve you. Infinity Consulting is a result-oriented consultancy firm. When we take on a project we give our clients a money-back guarantee for our service. Unlike our competitors, we go the extra mile to make sure our client's objectives are met. With our innovative approach and our large pool of consultants, we can provide the best service. Please talk to us to see how we can help you.

OUR SOLUTIONS

OUR SOLUTIONS

Enterprise Resource Planning Solution

In a world where digital transformation takes place in every passing minute, every business should consider taking their operations to the next level. Otherwise, they won't be able to survive or move forward in the industry. We provide a quite straightforward approach to design your own bespoke Enterprise Resource Planning solution including the relevant functionalities of the operation system of your company as per the requirement.

HR Solution

Whether it is a medium sized or a big company, managing human resources is a challenging task. Automation of the HR process will free your employees from dreary manual tasks and allow them to focus more on decision making. Our HR module allows creating your own hiring strategies, employee onboarding, timesheet management, leave handling and performance management.

OUR SOLUTIONS

Financial Solution

Company financial operations are undeniably the centerpiece for most frauds and deceptions. Which is why, a powerful software is essential to monitor all the transactions on a real-time basis. Make your key finance-related tasks such as accounts reconciliation, journal entries, and preparing financial statements automated with minimal human intervention. Eliminate every loophole which allows people to misuse company resources.

Micro Finance Solution

Microfinance Solution helps financial institutions deepen customer engagement and product usage, and in turn promote and increase financial inclusion.
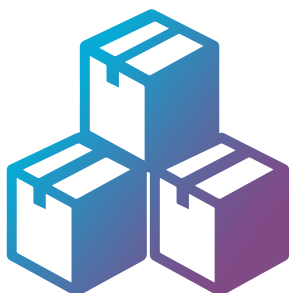

OUR SOLUTIONS

Customer Relationship Management (CRM)

Customer Relationship Management (CRM) module is a software system that helps business owners easily track all communications and nurture relationships with their leads and clients. A CRM replaces the multitude of spreadsheets, databases and apps that many businesses patch together to track client data. The result: organization, efficiency, better time management, and impressed clients.

Stock & Inventory

From purchasing materials to monitoring resale, production stock or finished products, you need to keep track of each and every task which makes the entire operational process along with the responsible parties. Enhance productivity by having a smart double entry system and track every stock movement with the system solution.

OUR SOLUTIONS

Hotel & Restaurant Solution

We are providing the best simple cloud software solutions for the hospitality industry to manage their complete operation accurately. The software gives a real time system which can be operated efficiently in restaurants, bars, night clubs, quick service restaurants, delivery and other operations, banquet, reservation, availability management, etc. The simple approach, ease of use and rock-solid reliability makes the software a great system for your needs.

POS System Solution

Our cloud restaurant POS software is a complete package that businesses require to streamline their operations and grow their business. Regardless of the type and size of your business, our POS solution fits all and can organize everything. The versatility of this software makes it a choice of most businesses. Discover its outstanding features below:

- Order Management
- Delivery Management
- Menu Management
- Billing and Payments

OUR SOLUTIONS

E Commerce Solution

E-commerce Solution is the products and services that help a company conduct business electronically. The range of available e-commerce solutions is vast, including those that allow traditional businesses to design, create, and operate World Wide Web sites. Some solutions focus on a specific problem
